

Audience Behavior Report – Q1 2025

Viewing Patterns

Average watch time across all titles was 87 minutes in Q1 2025, up from 79 minutes in Q1 2024. Action genre leads with 106 minutes average, followed by Sci-Fi at 98 minutes.

Completion rates are highest for Action (93%) and Sci-Fi (90%) titles. Comedy titles average only 38% completion rate, indicating significant audience drop-off.

Mobile is the fastest-growing device, accounting for 42% of all views. TV remains dominant at 48%. Laptop accounts for 10%.

Demographics

Core audience aged 25-44 accounts for 61% of total viewership. The 18-24 segment is growing fastest at 28% YoY.

Gender split is 54% male, 46% female. Female viewers show stronger preference for Drama titles; male viewers skew toward Action and Sci-Fi.

Premium subscribers watch 2.3x more content than Basic subscribers and have 94% higher completion rates.

Engagement Analysis

Mumbai has the highest engagement score globally at 83, driven by large youth population and high smartphone penetration. New York leads among Western markets at 88.

Engagement scores correlate strongly with content quality ratings. Titles rated above 8.0 average an engagement score 40% higher than titles below 7.0.

Comedy titles show the weakest engagement, with The Laughing House, Laugh Track, and The Comedy Club all scoring below 35 on the engagement index.

Binge Behavior

Action and Sci-Fi viewers are most likely to rewatch titles or watch sequels. 28% of Stellar Run viewers started watching the movie a second time within 7 days.

Drama viewers have the highest cross-title discovery rate: after watching Last Kingdom, 67% went on to watch at least one other Drama title within 30 days.

Comedy Performance Analysis

Comedy genre weak performance is explained by several factors: outdated humor formats, low production values relative to audience expectations, and poor demographic targeting in marketing campaigns.

Audience research indicates that the comedy content currently available appeals to a narrower demographic than intended. The 18-24 age group, which drives most viral content sharing, is underserved by current comedy offerings.

Recommendations to improve comedy: refresh creative direction, invest in character-driven scripts, improve casting with talent that resonates with younger demographics, and pilot shorter-format comedy content.
