

Content & Data Policy Guidelines

Content Classification Policy

All titles must be classified by genre, rating, and audience suitability before release. Misclassification may result in campaign inefficiencies and audience mismatch.

Action, Sci-Fi, and Thriller titles require age-gating for audiences under 13. Drama and Comedy titles require content advisories where applicable.

Data Collection & Privacy

Watch activity data is collected with explicit user consent. Viewer IDs are anonymized in all analytics exports. Personal data is never shared with third-party advertisers.

Regional performance data is aggregated at the city level to prevent individual identification. Minimum cohort size for any reported metric is 1,000 viewers.

Marketing Spend Governance

All campaigns above \$100K require senior marketing approval. Campaigns above \$500K require executive sign-off.

Influencer partnerships must be disclosed per FTC guidelines. All sponsored content must include #ad or #sponsored tags.

Channel budget allocations must be reviewed quarterly against conversion benchmarks.

Review & Rating Standards

Viewer reviews are monitored for authenticity. Reviews from accounts with suspicious activity patterns are quarantined pending review.

Sentiment analysis is performed on all reviews. Titles with negative sentiment scores below -0.3 trigger an automatic content quality review.

Star ratings below 4/10 from more than 20% of reviewers triggers a leadership review of the content acquisition decision.

Compliance & Reporting

Quarterly performance reports must be submitted to the board within 30 days of quarter end.

Regional performance data must be reviewed monthly by regional leads with escalation protocols for engagement score drops exceeding 15%.
